

PERISIAN ANTI-VIRUS

Symantec Endpoint Protection (SEP) v.14

Pembekalan perkhidmatan antivirus Symantec oleh Bahagian Pengurusan Maklumat (BPM) bagi semua bahagian KPM akan dilaksanakan untuk tempoh projek selama 3 tahun (2017 – 2020). Pemasangan perisian Symantec telah dilaksanakan di BTP pada 18-20 April 2017. Semua PC dan laptop milik BTP perlu di instalasi dengan perisian antivirus.

Icon	Description
	The client runs with no problems. It is either offline or unmanaged. Unmanaged clients are not connected to a management server.
	The client runs with no problems. It is connected to and communicates with the management server. All components of the security policy protect the computer. The icon displays a green dot.
	The client has a minor problem, for example, the antivirus definitions may be out of date. The icon displays a yellow dot with a black exclamation mark.
	The client does not run, has a major problem, or has at least one security policy protection component disabled. For example, Antivirus and Antispyware Protection may be disabled. The icon displays a white dot with a red outline and a red line across the dot.

Pastikan status adalah hijau

Ctrl-Click Symantec Endpoint Protection (SEP) v.14 (5 layers of protection)

Prevention (Network)
Blocks malware before it spreads to your machine and controls traffic.

Antivirus (File)
Blocks suspicious files - even those with no fingerprint - before they can run and steal your data.

Insight (Reputation)
Safety ratings for every single software file on the planet, and uses this to block targeted attacks.

Sonar (Behaviours)
Blocks software with suspicious behaviours to stop advanced threats.

Power Eraser (Repair)
Aggressive scan technology roots out entrenched infections and kills them in seconds.
